

EVO Dual Inner/Outer Thigh Machine

+ Key Features

Robust and Durable, Value-Optimized Choice
Constructed from Q235A cold-rolled steel with 40 × 140 mm square tubing and 50 × 100 mm oval tubing for exceptional durability. Finished with electrostatic powder coating and tested to withstand over 800 hours of salt spray exposure.

Complete Hip Control, Inside and Out
Seamlessly switch between hip abduction and adduction exercises. The quick-flip adjustment design allows instant transitions with a simple hand movement – effortless and time-efficient. For those who love "superset training," this feature will be your greatest delight.

Stable Seating for Precise Training
The seat and backrest utilize premium high-density padding, providing comfortable and stable support. Side-mounted grip handles further enhance training stability, maximizing hip muscle engagement and training effectiveness.

Precision Weight Stack Engineering, Professional Training Assurance
High-density cast iron weight stack with a durable, corrosion-resistant powder-coated finish. Precision-calibrated increments and a maximum weight of 125 kg support a wide range of training needs.

Product Overview

The VO3 EVO Inner/Outer Thigh machine provides smooth, controlled training for adductor and abductor muscle development. Built for commercial facilities, it delivers durability, stability, and ergonomic comfort.
